

All FP 7 projects are required to have a Gender Action Plan (GAP). This reflects the European Comissions's desire to promote gender equality as a mainstream issue. These pages are to support gender actions in the ACQWA project, specifically to:

1. Report annually on actions promoting gender equality which have been performed at the project level, and on the rates of male/female participation at all levels of the project. The Annual Gender Action Plan Report is also intended to provide a critical assessment of the monitoring statistics provided by partners, with recommendations for action, where appropriate.
2. Provide practical information on recruitment procedures, networks, good practice, etc. and other gender related activities for the ACQWA partners.
3. Provide links to other projects/international organizations related to gender action aspects.
